HOW THE FEATURES WORK

Wild symbols. There are good wilds and bad wilds. The bad ones are triggered by the pitchfork and the good ones by the halo, and they carry multipliers from 1X to 5X. Three, four or five of them also act as scatter pays: 30 for 3, 150 for 4, and for the fifth, 500 on the good side and 1,000 on the bad.

QUICK ANSWERS

What is the difference between the good and bad sides? The good side wins more often with smaller payouts. The bad side wins less often but pays more.

Can you play both sides at once? Yes, by doubling your bet to cover all 30 lines.

PLAY IT SMART

- No slot is ever due. A long dry spell does not make a win more likely.
- Bigger bets do not change the odds of a win, only its size and the cost of each spin.
- The payout percentage is a long-run average, not a promise for one session.
- Play with money you can afford to lose, and take breaks.
